

**PRECISION**  
TERRAIN SOLUTIONS

**T3RRA Cutta™**

## Survey, Design, & Implement

**3D elevation & rainfall simulation**

### The Next Revolution in Earth Moving

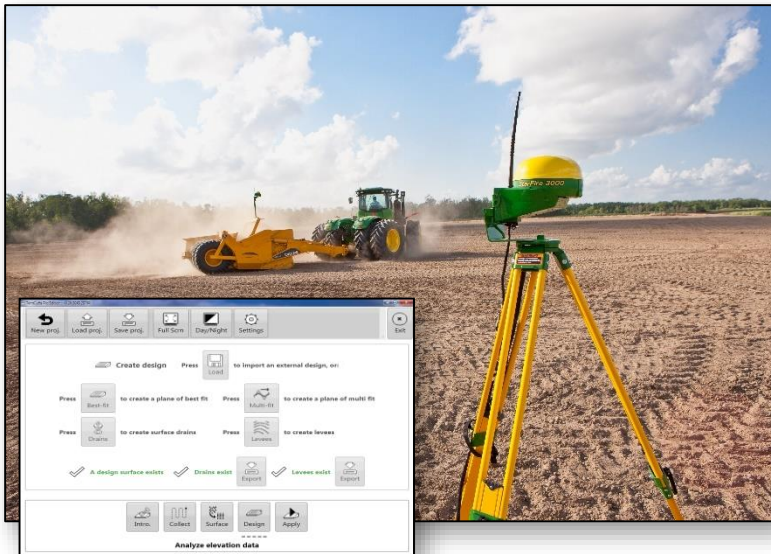

T3RRA Cutta™ (T3C) *in-cab* land forming software greatly enhances the capability and efficiency of John Deere iGrade™. It operates as a *stand-alone* data collection, processing, and design program. No other software is required.

**Dealer supported:** Other than an extra tablet console, there is no non-John Deere hardware involved, making service and support via your regular dealer a breeze. Leverage your existing investment in John Deere AutoTrac™ without buying expensive new 3<sup>rd</sup> party GPS.

**Simple to use:** T3RRA Cutta™ allows operators to create single or multi-fit designs for land levelling using a simple, wizard based format. Surface drain, roads, and levee creation is also supported, with exports of GreenStar™ guidance tracks.

**Whole farm optimization:** T3RRA Cutta™ license owners can import T3C collected data & compatible 3<sup>rd</sup> party data cost-free within the T3RRA Design™ desktop package. This comprehensive, yet grower-friendly, land forming package offers power user capabilities not normally seen outside engineering-grade CAD software.

**Available exclusively from your local John Deere Dealer.

**T3RRA Cutta™**

*All-in-one land-forming solution*

- Operates as a stand-alone data collection, processing and design program.
- Allows operators to easily collect, design, and implement optimized surfaces without leaving the cab of the tractor.
- Includes interactive water flow modeling to view simulated water movement for new designs.

- Designed specifically to enhance and extend John Deere iGrade™.
- On-screen cut/fill and design maps in 3D.
- T3RRA Cutta™ allows in-cab collection, design, and implementation.
- Advanced desktop functionality can be accessed using T3RRA Design™.

**T3RRA Design™**

*Professional-grade desktop terrain design*

- Full farm terrain analysis and design that doesn't require an engineering degree to operate.
- T3RRA Cutta™ license owners can use T3C collected data & compatible 3rd party data at no charge in T3RRA Design™.
- No data lock-in. Can import and export many formats.

## Features

	Module	Description	Connects to iGrade	Whole field survey	Creates Surfaces	Creates Drains & Levees	Water Flow Simulator	Adv. guides & analysis	Implements surfaces	Implements Drains & Levees	Exports Guidance Lines	OptiSurface Compatibility	Trimble Compatibility	Generic data import and export
<b>In Cab</b>	<b>T3RRA Cutta™</b>	Full land-forming surface, drain, and levee capabilities.	X	X	X	X	X	+	X	X	X	X	+	
<b>Office</b>	<b>T3RRA Design™</b>	Desktop analysis & design package			X	X	X	X			X	X	X	X
